SOFT SKILLS

- Leadership
- Team Work
- Team Management
- Problem Solving
- Organizing Skills
- Presentation Skills
- Trilingual
- Multitasking

PROFILE

I am a motivated and enthusiastic Software Engineering student passionate about building real world applications and learning modern technologies. I am currently developing my skills in full stack development while also gaining an interest in DevOps practices. I enjoy turning ideas into functional solutions, from creating responsive web interfaces to building backend systems that address real user needs. I am adaptable and open to contributing in different areas of development, always willing to learn, support team efforts and grow within a professional environment. I am able to work effectively in diverse environments and possess strong communication skills in spoken and written English, Sinhala and Tamil. I am currently seeking an Internship where I can gain industry experience and make a meaningful contribution.

EDUCATION

Bachelor of Software Engineering Honours	2023- Present
Open University of Sri Lanka	
Advance Level Examination	2020
A / K. B. Rathnayeka College	
Ordinary Level Examination	2017
A / K. B. Rathnayeka College	

CERTIFICATES & ACHIEVEMENTS

Diploma in Information Technology (1 Year)	2022
Esoft Metro Campus	
Diploma in English (1 Year)	2022
Rajarata University of Sri Lanka	
Diploma in English (8 Months)	2022
Esoft Metro Campus	
Certificate in Web Design	2024
University of Moratuwa	
Cost of Software Quality	2025
EdApp Online Platform	
Programming Using JavaScript	2025
Sololearn Online Platform	

LANGUAGES

English

Sinhala

Tamil 

INTREST IN

- Full Stack Development
- Mobile Application Development
- UI / UX Design
- DevOps Practices
- Cloud Technologies
- Project Documentations
- Learning New Technologies
- Frontend Development
- Problem Solving

REWARDED

- Prefect
- Member of Sinha Cricket Club
- Certificates for Sports

PROJECTS

CoCo Net

2024

During Sri Lanka's economic crisis, skyrocketing fuel prices and disrupted transportation networks caused severe shortages of essential commodities, including coconuts a staple ingredient in Sri Lankan households and hospitality industry. The lack of a digital communication channel between farmers and distributors worsened the shortage, driving prices up and leaving both ends of the supply chain operating blindly. As a university project, I identified this real-world gap and built CoCo Net, a native Android application that digitally connects coconut farmers and distributors island wide, enabling real time stock visibility, transparent pricing and location based discovery reducing the communication barrier that contributed to the shortage.

Mini Mates

2025

As a university group project, we partnered with Sussex College as our real world client to build a preschool management system called Mini Mates for their primary section. The project aimed to improve communication and streamline academic and administrative processes between the school, teachers, and parents. So we commit to this project and As the group leader, I oversaw the entire project lifecycle from requirement gathering and system design to development, testing and final demonstration, leading a team of 5 members through a 9-month journey to deliver a practical, client ready solution.
